

**ROC's DEIS Alternative for Travel Management on the Lassen National Forest**

**5/28/2008**

**ROC's Assumptions:**

- Allow mixed use on all unpaved NFS ML 3 and 4 roads with appropriate "share the road" information, road signs, and maps.
- Coordinate with counties to allow mixed use on all unpaved county roads through the forest.
- Lower objective MLs and only raise when temporarily needed for log haul or other purposes.
- Restrict vehicle travel into primitive campsites by water. Designate areas where vehicles should park (e.g. Middle Ridge) or 1 vehicle length from a system route (e.g. 28N69 SW of Finley Lake, Gaither Camp, etc.). Many primitive campsites should be field checked to designate parking areas further back from water.
- Designate roads to all recreation residences, developed campgrounds and other developed recreation sites under permitted use. ROC did not identify each one specifically.
- Due to separate planning efforts and NEPA, routes were not proposed in the High Lakes and Front Country OHV Areas.
- ROC recommends separate area and collaborative planning for OHV trail systems from some communities such as Prattville, Spalding, Johnson Park, and an HCRD unnammed subdivision.
- ROC recommends wheeled vehicle restrictions on all groomed snowmobile trails from December 25 to March 31 to prevent rutting.
- Where indicated, MLs for District routes reflect District recommendations, not ROC's. Most of ROC's proposed routes would be added as trails over 50 inches\*\*.
- Specific routes to consider designating are listed below. Note: several routes are listed twice in the resource concerns database, but are in different quarter quads

**COLOR KEY for routes from District 2007 Discussion Draft Proposals**

- blue fill = ALRD IDT routes match with ROC routes; blue = ALRD add or check routes
- green fill = ELRD IDT routes match with ROC routes; green = ELRD add or check routes
- orange fill = HCRD IDT routes match with ROC routes; red = HCRD add or check routes

UA = unauthorized route. Some routes were not found in the LNF's UA spreadsheet of resource concerns.

\*\* Over 50 inches = jeeps, ATVs, motorcycles, side-by-side ATVs. Route not intended for large pick-ups or large SUVs.
