

ROC's DEIS Alternative for Travel Management on the Shasta-Trinity National Forest

9/16/2008

ROC's Assumptions:

Allow mixed use on all unpaved NFS ML 3 and 4 roads with appropriate "share the road" information, road signs, and maps.

Coordinate with counties to allow mixed use on all unpaved county roads through the forest.

Lower objective MLs and only raise when temporarily needed for log haul or other purposes. Consider converting some roads to motorized trails.

Provide access to primitive campsites. Designate areas where vehicles should park or 1 vehicle length from a system route that accesses each campsite. Many primitive campsites on streams and lakes should be field checked to designate parking areas further back from the water.

ROC recommends wheeled vehicle restrictions on all groomed snowmobile trails from December 25 to March 31 to prevent rutting.

Specific routes to consider designating and to develop a range of DEIS alternatives are listed below. Some column cell information was missing from the route lists submitted by ROC members and local clubs.

** Over 50 inches = jeeps, ATVs, motorcycles, side-by-side ATVs. Route not intended for large pick-ups or large SUVs.

Map Number	Route ID	Vehicle Class	Season of Use	Remarks
MAP 1	EA710		Yearlong	Nice for family recreation and sightseeing
